Scheme of Examination PGDCA/ M.Sc. Computer Science (Software)							
1 st Year/ MCA 1 st Year							
Paper	Nomenclature	Max. Marks Pass					
Code		External	Internal	Total	Marks		
CS-DE-11	Computer Organization & Networking	80	20	100	35		
	Fundamentals						
CS-DE-12	Problem Solving Through 'C'	80	20	100	35		
CS-DE-13	Data Structures	80	20	100	35		
CS-DE-14	Data Base Management System	80	20	100	35		
CS-DE-15	Operating System	80	20	100	35		
CS-DE-16	Software Lab – I Programming using C	80	20	100	35		
CS-DE-17	Software Lab – II Word, Excel,	80	20	100	35		
	Access/SQL						
			700	245			

CS-DE-11 COMPUTER ORGANIZATION & NETWORKING FUNDAMENTALS

Maximum Marks: 100	Minimum Pass Marks: 35	Time: 3 hours
External: 80	Internal: 20	

Note: Examiner will be required to set NINE questions in all. Question Number 1 will consist of objective type/short-answer type questions covering the entire syllabus. In addition to the compulsory question there will be four units i.e. Unit-I to Unit-IV. Examiner will set two questions from each Unit of the syllabus. All questions will carry equal marks.

Students will be required to attempt FIVE questions in all. Question Number 1 will be compulsory. In addition to compulsory question, students will have to attempt four more questions selecting one question from each Unit.

UNIT - I

Fundamentals of computers: Block diagram of a digital computer, classification, hardware, software, I/O devices, storage devices – hard disk, pen drive, optical devices.

Information representation - Number Systems, conversion from one number system to another number system, Integer Representation – sign magnitude, 1's complement, 2's complement, BCD codes. Floating-point Representation, Binary arithmetic – addition, subtraction multiplication, division.

UNIT - II

Boolean Functions: Boolean algebra, Truth tables, Logic gates, Canonical representation of Boolean functions, simplification of Boolean expressions – Karnaugh Maps, Quine McCluskey procedure.

Combinational Circuits: Half adder, full adder, half subtractor, full subtractor, parallel binary adder, BCD adder, code converter, decoder, encoder, multiplexer, demultiplexer.

UNIT - III

Sequential Circuits: Flip-flops – synchronous & asynchronous basic flip flops, D-type & T-type flip flops, JK flip flop, master-slave flip flop, characteristics & excitation tables of flip-flops.

Registers - shift registers. Counters - synchronous & asynchronous binary counters, modulo-N counter.

UNIT - IV

Introduction to Computer Networks: Types of Computer Networks and their topologies. Transmission media - wired and wireless. Network hardware components - connectors, transceivers & media converters, repeaters, network interface cards and PC cards, bridges, switches, routers, gateways.

Introduction to the Internet, concepts of Internet and Intranet; IP addresses, DNS; Internet Services; E-mail; File transfer and FTP; Remote login using TELNET; World Wide Web and HTTP; Web Browsers; Search Engines; Uniform Resource Locator(URL); Web Servers; Internet Connections: Dialup; Leased line; Modems; DSL service; Internet Service Provider.

Text Book

- 1. Digital Logic and Computer Design, M. Morris Mano, PHI, 2000
- 2. Computer Communications and Networking Technologies, Michael A. Gallo, William M. Hancock, CENGAGE Learning.
- 3. Foundations of Computing, P.K. Sinha, BPB.

- 1. An Introduction to Digital Computer Design, V. Rajaraman, T. Radhakrishnan, PHI, 2002
- 2. Computer Networks, Andrew S. Tanenbaum, Pearson.
- 3. Computer Networking, James F. Kurose, Keith W. Ross, Pearson.Data Communications and Networking, Behrouz A Forouzan, McGraw Hill.

CS-DE-12 PROBLEM SOLVING THROUGH 'C'

Maximum Marks: 100	Minimum Pass Marks: 35
External: 80	Internal: 20

Time: 3 hours

Note: Examiner will be required to set NINE questions in all. Question Number 1 will consist of objective type/short-answer type questions covering the entire syllabus. In addition to the compulsory question there will be four units i.e. Unit-I to Unit-IV. Examiner will set two questions from each Unit of the syllabus. All questions will carry equal marks.

Students will be required to attempt FIVE questions in all. Question Number 1 will be compulsory. In addition to compulsory question, students will have to attempt four more questions selecting one question from each Unit.

UNIT-I

Programming Fundamentals: Introduction to Compiler, Assembler and Interpreter, Concept of problem solving, Problem definition, Program design, Debugging, Types of errors in programming, Documentation. Flowcharting, decision tables, algorithms, Structured programming concepts, Programming methodologies - top-down and bottom-up programming.

UNIT-II

Overview of C: History of C, Importance of C, Structure of a C Program.

Elements of C: C character set, identifiers and keywords, Data types, Constants and Variables.

Operators: Arithmetic, relational, logical, bitwise, unary, assignment and conditional operators and their hierarchy & associativity.

Input/output: Unformatted & formatted I/O function in C.

UNIT-III

Control statements: Sequencing, Selection: if and switch statement; Repetition: for, while, and do-while loop; break, continue, goto.

Functions: Definition, prototype, passing parameters, function calls, library functions, recursion.

Storage classes in C: auto, extern, register and static storage class, their scope, storage, & lifetime.

Arrays: Definition, types, initialization, processing an array, passing arrays to functions, dynamic arrays.

UNIT-IV

Strings: String handling, reading and writing strings, string functions, dynamic strings.

Pointers: Declaration, operations on pointers, pointers and arrays, dynamic memory allocation, pointers and functions, pointers and strings.

Structure & Union: Definition, processing, Structure and pointers, passing structures to functions, Union.

Text Books:

- 1. Sinha, P.K. & Sinha, Priti, "Computer Fundamentals", BPB
- 2. Dromey, R.G., "How to Solve it By Computer", PHI
- 3. Gottfried, Byron S., "Programming with C", Tata McGraw Hill
- 4. Balagurusamy, E., "Programming in ANSI C", McGraw-Hill
- 5. Balagurusamy, E., "Computing Fundamentals & C Programming", McGraw-Hill

- 1. Jeri R. Hanly & Elliot P. Koffman, "Problem Solving and Program Design in C", Addison Wesley.
- 2. Yashwant Kanetker, "Let us C", BPB
- 3. Norton, Peter, "Introduction to Computers", McGraw-Hill
- 4. Leon, Alexis & Leon, Mathews, "Introduction to Computers", Leon Tech World
- 5. Rajaraman, V., "Fundamentals of Computers", PHI
- 6. Rajaraman, V., "Computer Programming in C", PHI

CS-DE-13 DATA STRUCTURES

Maximum Marks: 100 External: 80

Minimum Pass Marks: 35 Internal: 20 Time: 3 hours

Note: Examiner will be required to set NINE questions in all. Question Number 1 will consist of objective type/short-answer type questions covering the entire syllabus. In addition to the compulsory question there will be four units i.e. Unit-I to Unit-IV. Examiner will set two questions from each Unit of the syllabus. All questions will carry equal marks.

Students will be required to attempt FIVE questions in all. Question Number 1 will be compulsory. In addition to compulsory question, students will have to attempt four more questions selecting one question from each Unit.

UNIT –I

Introduction to Data Structures: Elementary data organization, Data structure operations, Algorithm complexity and time-space tradeoff, Classification of data structures.

String Processing: Storing strings, String operations, Pattern matching algorithms.

Arrays: Linear arrays, Operations on arrays, Multidimensional arrays, Storage of arrays, Matrices, Sparse Matrices.

UNIT-II

Linked Lists: Representation of linked list in memory, Traversal, Searching, Insertion, Deletion, Sorted Linked List, Header List, Two – Way List;

Stacks, Queues, Linked and Array representation of Stacks, Queues, and Dequeues, Priority Queues, Operations on stacks and queues.

UNIT –III

Applications of stacks: Recursion, Polish Notation, Quicksort.

Trees: Binary Trees, Representation of binary trees in memory, Threaded Binary Trees, Balanced Tree, Different tree traversal algorithms, Binary Search Tree: Searching, Insertion, and deletion in a Binary search tree, Heap Sort.

UNIT-IV

Representation of Graphs and Applications: Adjacency Matrix, Path Matrix, Warshall's Algorithm, Linked Representation of a Graph, Traversing a Graph;

Sorting and Searching: Radix Sort, Merge Sort, Linear Search, Binary Search, Insertion Sort, Selection Sort, Bubble Sort.

Text Books:

- 1. Seymour Lipschutz, "Data Structures", Tata Mcgrraw- Hill Publishing Company Limited, Schaum's Outlines, New Delhi.
- 2. Yedidyan Langsam, Moshe J. Augenstein, and Aaron M. Tenenbaum, "Data Structures Using C", Prentice- Hall of India Pvt. Ltd., New Delhi.

- 1. Trembley, J.P. And Sorenson P.G., "An Introduction to Data Structures With Applications", McGraw-Hill International Student Edition, New York.
- 2. Mark Allen Weiss, "Data Structures and Algorithm Analysis in C", Addison- Wesley, (An Imprint of Pearson Education), Mexico City. Prentice- Hall of India Pvt. Ltd., New Delhi.

CS-DE-14 DATA BASE MANAGEMENT SYSTEMS

Maximum Marks: 100 External: 80

Minimum Pass Marks: 35 Internal: 20 Time: 3 hours

Note: Examiner will be required to set NINE questions in all. Question Number 1 will consist of objective type/short-answer type questions covering the entire syllabus. In addition to the compulsory question there will be four units i.e. Unit-I to Unit-IV. Examiner will set two questions from each Unit of the syllabus. All questions will carry equal marks.

Students will be required to attempt FIVE questions in all. Question Number 1 will be compulsory. In addition to compulsory question, students will have to attempt four more questions selecting one question from each Unit.

Unit- I

Data, Information and Knowledge – Limitations of Manual Data Processing – Advantages of databases-Basic DBMS Terminology – Role of DBA, Data Manager, File Manager and Disk Manager- Three Level Architecture of DBMS- Physical and Logical Data Independence, Data Base languages and Interfaces, DBMS functions and component modules.

Unit- II

Entity Relationship Model- Concepts, Relationships, Constraints, Keys- Primary, Secondary, Composite & Foreign Key etc. E-R Diagrams, Mapping ER- diagrams to Relational Tables, Case studies: Inventory System, Payroll System, Reservation System, Online Book Store etc. Introduction to Data Models, Comparison between Hierarchical, Network and Relational models.

Unit- III

Relational Algebra- Query Language, Basic Set Operations, Special Relational Operations, Introduction to SQL: DDL, DML, and DCL Commands, Views& Queries in SQL, Specifying Constraints & Indexes in SQL. Functional Dependencies, Normalization- Normal forms based on primary keys (1 NF, 2 NF, 3 NF, & BCNF)

Unit- IV

MS Access: Parts of an Access Window, Tool Bars and Their Icons, Creating a New Database, Creating a Database through Table Wizard, Creating a New Table, Relationships, Creating Table through Design View, Relationship, Query, Forms, Reports, Import/export tables etc.

Text Books:

- 1. Elmasri & Navathe, Fundamentals of Database systems, 5th edition, Pearson Education.
- 2. Taxali, R. K., "PC Software for Windows made simple", Tata McGraw Hill.
- 3. Ivan Bayross, "SQL, PL/SQL The Programming Language of Oracle", BPB Publications.

- 1. Korth & Silberschatz, Database System Concept, 4th Edition, McGraw Hill International Edition.
- 2. Raghu Ramakrishnan & Johannes Gehrke, Database Management Systems, 2nd edition, Mcgraw Hill International Edition.
- 3. Database Systems, A practical Approach to Design, Implementation and Management, Pearson Education- 3e
- 4. C.J. Date, An Introduction to Data Bases Systems 7th Edition, Addison Wesley N. Delhi.
- 5. Bipin C. Desai, An Introduction to Database System, Galgotia Publication, N. Delhi.
- 6. Windows XP Complete Reference. BPB Publications
- 7. MS Office XP complete BPB publication

CS-DE-15 OPERATING SYSTEMS

Maximum Marks: 100 External: 80

Minimum Pass Marks: 35 Internal: 20

Time: 3 hours

Note: Examiner will be required to set NINE questions in all. Question Number 1 will consist of objective type/short-answer type questions covering the entire syllabus. In addition to the compulsory question there will be four units i.e. Unit-I to Unit-IV. Examiner will set two questions from each Unit of the syllabus. All questions will carry equal marks.

Students will be required to attempt FIVE questions in all. Question Number 1 will be compulsory. In addition to compulsory question, students will have to attempt four more questions selecting one question from each Unit.

UNIT – I

Introductory Concepts: Operating system functions and characteristics, historical evolution of operating systems, Real time systems, Distributed systems, O/S services, system calls, system programs.

CPU Scheduling: Process concept, Process scheduling, scheduling criteria, Scheduling algorithms.

UNIT-II

Deadlocks: Deadlock characterization, Deadlock prevention and avoidance, Deadlock detection and recovery. Storage Management: Storage allocation methods: Single contiguous allocation, Multiple contiguous allocation, Paging; Segmentation, Virtual memory concepts, Demand Paging, Page replacement Algorithms, Thrashing.

UNIT-III

File Systems: File concept, File access and allocation methods, Directory Systems: Structured Organizations. Hardware Management: Disk scheduling policies.

Protection: Goals of protection, principles of protection, domain of protection, access matrix & its implementation, revocation of access rights.

UNIT-IV

Windows: Features of Windows; Various versions of Windows & its use; My Computer & Recycle bin; Desktop, Icons and Windows Explorer; Dialog Boxes & Toolbars; Working with Files & Folders; simple operations like copy, delete, moving of files and folders from one drive to another, Accessories and Windows Settings using Control Panel.

Linux: Linux architecture, Features of Linux, Simple Commands in Linux.

Text Books:

- 1. Silberschatz A., Galvin P.B., and Gagne G., Operating System Concepts, John Wiley & Sons, Inc., New York.
- 2. Ibrahim Mohammad, A Practical Guide to Linux & Shell Programming, Laxmi Publications
- 3. Taxali, R. K., "PC Software for Windows made simple", Tata McGraw Hill.

- 1. Godbole, A.S. Operating Systems, Tata McGraw-Hill Publishing Company, New Delhi.
- 2. Ritchie, Colin, Operating Systems incorporating UNIX & Windows, BPB Publications, New Delhi.
- 3. Deitel, H.M., Operating Systems, Addison- Wesley Publishing Company, New York.
- 4. Tanenbaum, A.S., Operating System- Design and Implementation, Prentice Hall of India, New Delhi.
- 5. Stalings William, Operating System, Prentice Hall of India, New Delhi.
- 6. Blackburn, Andrew, "MS Windows XP Home Edition Complete", Laxmi Publications.
